EDUCATION

City University of New York - Brooklyn College *Brooklyn, NY*
Bachelor of Science in Computer Science

January 2022 - December 2025

SKILLS

- **Tools:** Python, C++, Linux, SQL, Oracle Database, MS Excel, GE Reliance AEMS, AVEVA PI System, Kubernetes.
- **Certifications:** AWS Certified Solutions Architect – Associate, CompTIA Security+, Building AI Agents with MongoDB
- **Leadership:** 3x Hackathon Winner, Computer Science Club President, Organizer of Google Developer Group on Campus.

WORK EXPERIENCE

Con Edison - Associate System Analyst; Co-op (10/2025 – 06/2026) *New York, NY* October 2025 - Present

- Analyzed operational data and validated system records with Excel and Python to support Energy Control Center reliability.
- Built dashboards to monitor and manage energy systems across 50+ substations, improving visibility and fault response.

MTA - Data Engineer Intern *New York, NY*

June 2025 - August 2025

- Automated data processing pipelines with Python, SQL, Airflow, and Spark, reducing manual data processing time by 30%.
- Created a Kubernetes cluster on 5 Linux servers to deploy data applications, increasing application availability by 50%.

Shared Studios - AI Engineer Intern *Brooklyn, NY*

February 2025 - March 2025

- Created an AI voice assistant leveraging internal data and LLM to handle user queries and enhance user engagement.
- Developed a speech-to-text function with Python, enabling voice commands and reducing manual interaction time by 40%.

Memorial Sloan Kettering Cancer Center - DevSecOps Intern *New York, NY*

June 2024 - August 2024

- Migrated 2 on-prem applications to AWS using highly available architectures (multi-availability zones, managed services).
- Automated CI/CD with Docker and GitHub Actions; used Terraform for infrastructure, cutting deployment times by 50%.

AuriStor, Inc - Software Engineer Intern *New York, NY*

February 2024 - April 2024

- Deployed a Kubernetes dashboard, streamlining the management and monitoring of Kubernetes clusters.
- Built a dashboard website with TypeScript and Golang to manage 1,000+ container image layers, improving visibility.

Nearabl, Inc - Software Engineer Intern *New York, NY*

September 2023 - January 2024

- Built an object detection app with Python, Flask, OpenCV, and React, enhancing Nearabl's AI visualization capabilities.
- Leveraged AWS S3 and DynamoDB to manage object detection data, increasing data retrieval speed by 30%.

PROJECTS

Club Website and AI Chatbot - Computer Science Club President [[GitHub Link](#)]

June 2024 - May 2025

- Led a team of 10+ developers to build the club's website with Java and React, serving 1,000+ computer science majors.
- Developed an AI chatbot with Python, Flask, LangChain, and LLM, improving inquiry resolution speed by 200%.

NutriVoice (First Place at Columbia University Hackathon) - Tech Lead [[Devpost Link](#)]

February 2025

- Led a team to develop NutriVoice, an AI-powered nutrition tracking app for blind and visually impaired individuals, winning First Place in the Health & Accessibility Track.
- Integrated Whisper (Speech-to-Text), Computer Vision, and an open-source LLM with Text-to-Speech to analyze food images, extract nutrition facts, and deliver accessible, real-time dietary feedback for visually impaired users.
